Agriculture in India

The history of Agriculture in India dates back to Indus Valley Civilization and even before that in some places of Southern India. India ranks second worldwide in farm outputs. As per 2018, agriculture employed 50% of the Indian work force and contributed 17-18% to the country's GDP.

In 2016, agriculture and allied sectors like animal husbandry, forestry and fisheries accounted for 15.4% of the GDP (gross domestic product) with about 31% of the workforce in 2014. India ranks first in the world with highest net cropped area followed by US and China. The economic contribution of agriculture to India's GDP is steadily declining with the country's broad-based economic growth. Still, agriculture is demographically the broadest economic sector and plays a significant role in the overall socio-economic fabric of India.

Wholesale Distributors

Wholesale distributors play a key role in the food system by purchasing, aggregating, and transporting large volumes of food and distributing it to their customers.

By nature, distributors are the intermediate step in the supply chain between farmers and consumers, making a distributor a door through which farmers and producers can reach many customers and market opportunities. By nature, distributors are the intermediate step in the supply chain between farmers and consumers, making a distributor a door through which farmers and producers can reach many customers and market opportunities.

Farming is a profession of hope.

raman

Hey Donator! Your DID is 1. These are the farmers who need a helping hand.

Yellavva Dodmani, a farmer in Satti village.
"I have lost all the money I spent on seeds and fertilizers for raising crops on my five-acre farm due to the floods. The precious top soil is also lost. Now, I have to spend a lot of money again on labour and compost too to prepare land for the next sowing season."

Donate

Subbayya, a farmer in Peravaram village.
"I am not having enough money to support the family or to give back the loans. The crops did not make any profit as the wholesaler bought the crop for less price than proposed."

My FID is 8

Donate

Baikunth Kumar, a farmer in Mhow village.
"Due to lack of rains in our village, the seeds sown prior to monsoons have not germinated, due to which the yeild has not been productive."
